

# OGUNDELE OLUMIDE CALEB

Geography & Planning Science | Web Developer |  
Creative Designer.

☎ (234) 903-421-3439

✉ Olumide251@gmail.com

## Career Objective:

First Class graduate in Geography and Planning Science, recognized as the department's top performer. Combines expertise in GIS, remote sensing, and spatial analysis with full-stack web development and design. Skilled in applying data, code, and solving real-world problems in urban planning, environmental intelligence, and digital systems. Seeking roles where analytical thinking, geospatial intelligence, and technical execution drive sustainable, scalable outcomes.

## Education

**B.Sc. Geography and  
Planning Science**  
April 2024

### **Ekiti State University, Ado Ekiti**

- Graduated with First Class Honors
- Best Graduating Student in the Department of Geography and Planning Science

## Professional Experience

**National Youth Service  
Corps (NYSC)**  
2025

### **Lagos State Ministry of Physical Planning & Urban Development**

- **Planning & Policy Support:** Worked within Lagos MPPUD's Office of Physical Planning, which oversees urban planning policies, development plans and permit issuance. Assisted in technical tasks for plan formulation and permit review under the State's development-control framework (Lagos URPD Law and planning permit regulations).
- **Petition & Dispute Handling:** Reviewed public petitions and development disputes, coordinating investigations and joint site inspections in response to land-use complaint.
- **Planning & Policy Support:** Worked within Lagos MPPUD's Office of Physical Planning, which oversees urban planning policies, development plans and permit issuance. Assisted in technical tasks for plan formulation and permit review under the State's development-control framework (Lagos URPD Law and planning permit regulations).
- **Compliance Monitoring:** Conducted monitoring of ongoing construction projects for regulatory compliance. Participated in field inspections with enforcement teams and Lagos State Building Control Agency (LASBCA) officials. Supported government "zero tolerance" campaigns by tagging and documenting illegal structures – the Ministry's Technical Services team regularly sealed unapproved sites during joint operations.
- **Enforcement & Regulatory Action:** Helped enforce Lagos planning laws by verifying that all building works had valid planning permits. In practice, no development was allowed to continue without an approved permit and stage certification. Reported instances of non-compliance for formal sealing and sanction.

- **Planning Permit Coordination:** Assisted with processing planning permit applications and checking building plans against approved development standards.
- **Inter-Agency Collaboration:** Liaised with sister agencies (e.g. LASBCA, LASPPPA, Federal housing authorities) to streamline development-control procedures. Attended cross-agency meetings and compliance exercises (e.g. joint site assessments), ensuring coordinated enforcement of planning rules across government bodies.
- **Exposure to Planning Frameworks:** Gained in-depth exposure to Lagos State’s urban planning policies and statutes. Became familiar with key frameworks (URPD Law 2010, Lagos Physical Planning Permit Regulations, and the State Development Plan) through hands-on projects. Drafted technical reports and compliance memoranda that referenced these frameworks, reflecting the Ministry’s mandate to “oversee... preparation of physical development plans [and] grant of development permits

**Industrial Trainee  
(SIWES)  
2023**

**Ekiti State Ministry of Housing & Urban Development**

- Assisted in the analysis of urban planning data and contributed to the development of housing projects aligned with the state's urban development goals.
- Supported the collection and management of geographic and land use data, helping to produce maps and reports for various housing projects.
- Worked collaboratively with the Ministry's Bureau of Land to facilitate the integration of land records with ongoing urban projects.
- Gained practical experience in land use planning, policy development, and urban project coordination.

**Undergraduate  
Research  
2023**

**Ekiti State University**

Project Title: Forest Degradation in Protected Area - A Case Study of Ise-Ekiti, Ekiti State, Nigeria

- Conducted comprehensive spatial analysis to assess forest degradation in protected areas using remote sensing and GIS tools.
- Collected and processed satellite imagery and ground-truth data to evaluate environmental impacts and land use changes over time.
- Developed a strong understanding of sustainable land management, forest ecology, and environmental protection policies.
- Prepared detailed environmental impact reports to highlight the extent of degradation and recommend sustainable practices for forest conservation.

**Full Stack Developer  
2019 - 2022**

**Mckodev Tech Lab**

- Developed and maintained web applications for a range of industries, including e-commerce, business websites, personal blogs, and portfolio sites, using HTML, CSS, JavaScript, PHP, and jQuery.

**Freelance Web  
Developer  
Ongoing**

- Collaborated with small teams to build responsive and mobile-friendly websites, ensuring seamless user experiences across devices.
- Redesigned existing websites for clients, focusing on improving user interface (UI) design, enhancing speed, and modernizing features.
- Worked closely with clients to define project goals, troubleshoot issues, and provide ongoing technical support, ensuring optimal performance and client satisfaction.
- Increased website loading speed by an average of 30% across various redesign projects.
- Handled both front-end and back-end development, integrating databases, user authentication, and data security features.

**Technology Stack: Lempstack, Laravel, Django, DevOps**

- Developed and maintained web applications for a range of industries, including e-commerce, business websites, personal blogs, and portfolio sites, using HTML, CSS, JavaScript, PHP, and jQuery.
- Delivered high-quality web solutions for clients across various industries, including e-commerce, corporate business sites, blogs, and personal portfolios.
- Built and redesigned websites, continuously improving site structure, load time, and security protocols.
- Worked on numerous client projects, including NDA-protected work, and developed customized web platforms tailored to specific business needs.
- Focused on creating user-friendly, secure, and scalable websites with a strong emphasis on data security and modern design aesthetics.
- Regularly redesigned websites for clients to align with current trends and ensure that businesses maintain a competitive edge in digital presence.

## Creative Designer Ongoing

### Adobe Photoshop, Illustrator, Affinity Designer

- Completed a wide range of graphic design projects, including logo design, branding, promotional materials, and visual content creation for various industries.
- Integrated design workflows into web development to deliver cohesive digital branding.
- Delivered over 100+ successful design projects, contributing to both branding and digital marketing efforts for small businesses and personal brands.
- Specialized in creating visually compelling and marketable designs with an emphasis on clean, professional aesthetics.

## Leadership and Extracurricular Activities

### SSRC Student Union Council - Department Representative

- Represented the Department of Geography and Planning Science in the SSRC Student Union Council at the faculty level.
- Advocated for student needs and contributed to policy discussions and initiatives within the student government.
- Helped organize and coordinate student activities and events within the faculty.

### University Security Team (Marshall Organization)

- Member of a student-led initiative focused on providing protection and standing up for students who were unable to defend themselves.
- Worked collaboratively with university authorities and other team members to ensure a safe campus environment.

## Essay Competitions

- Participated in various faculty-level essay competitions, showcasing strong writing and analytical skills.

## Skills

### Programming Languages

PHP, JavaScript, HTML, CSS, MySQL, JSON, AJAX

### Web Frameworks

Laravel

### GIS Tools

ArcGIS, QGIS

### Remote Sensing and Spatial Analysis

Satellite imagery analysis, Data visualization, Spatial data analysis

### Cybersecurity Tools and Practices

Encryption, secure data management

### Version Control

Git, GitHub, Bitbucket

DevOps

Linux, Nginx, server management

Creative Designer

Adobe Photoshop, Illustrator

## Certifications and Training

Coursera - University of Toronto

Introduction to GIS Mapping- [Certificate](#)

Coursera - University of Toronto

GIS Data Acquisition and Map Design - [Certificate](#)

Coursera - University of Toronto

Spatial Analysis and Satellite Imagery in a GIS - [Certificate](#)

Coursera - University of Toronto

GIS, Mapping, and Spatial Analysis Capstone - [Certificate](#)

(ISC)<sup>2</sup> - CC

Certified in Cybersecurity - [Certificate](#)

Web Development and Design Training (Udemy, YouTube)

- Acquired most design skills through Udemy courses and YouTube tutorials.
- Gained advanced proficiency in web design and development, including Python and Django frameworks.

## Awards & Honors

**Best Graduating Student**

Department of Geography and Planning Science, Ekiti State University.

**SSRC Student Union Award**

Recognized for contributions to the Student Union Council as a department representative.

**Student Security Organization Award**

Commended for contributions to the university's student-led security initiative.
